

see why **ingredients** matter

Polypodium Leucotomos (PLE) changes the way your skin reacts to ultra-violet rays (UV). PLE is a potent anti-inflammatory that also boosts the skin's immune system.

Hyaluronic Acid (HA) is the best moisturizer for skin health. HA is a natural moisturizer already present in healthy skin, and K5 contains tiny molecules of HA to speed a moisturizing supplement to plump your skin.

Alpha Lipoic Acid helps the body make healthy new skin cells.

DMAE (dimethylaminoethanol) firms skin.

Ceramides increase healthy skin cell turnover, hold moisture, and soften dry rough skin.

Collagen Amino Acids stimulate production of new collagen and elastin, giving new skin strength & elasticity.

Flavonoids, derived from the world's healthiest foods, contain powerful anti-oxidants and enhance delivery of vital nutrients to the skin, improving clarity, color and tone.

Vitamin A stimulates cell growth and turnover.

Niacinamide (Vitamin B3) improves elasticity & enhances the skin's natural barrier function to erase discoloration and revive healthy tone and texture.

Vitamin C stimulates collagen synthesis, minimizing lines & scars. K5 uses a stable, long-lasting Vitamin C compound.

Vitamin K1 improves micro-circulation to the skin, reducing skin redness. Vitamin K2 regulates the deposition of Calcium, keeping elastin from hardening and causing wrinkles.

Zinc promotes the growth of collagen and is necessary for cell growth and turnover.

Magnesium slows down the aging of skin.

Manganese helps enzymes function and helps boost the immune system.

And this is just a partial list off all the vitamins and minerals in each bottle of K5.

K5 diabetic lotion formula

- relieve the stinging sensation of neuropathy foot pain
- repair and restore skin damaged by diabetes

The Diabetic Formula is specifically formulated lotion to treat lower extremity diabetic skin conditions, as it's been developed with PEA (Palmitoylethanolamide),

an ingredient which has been shown to perform a variety of biological functions related to neuropathic pain. The Diabetic formula has many key ingredients, such as Citrulline which is fantastic for capillary health, PLE which is a very strong anti-inflammatory and anti-oxidant along with all of the other amazing raw materials.

NO PRESCRIPTION NEEDED

K5 offers two formulas which can be purchased without a prescription. The diabetic formula uses ingredient proven to help reduce nerve pain, while the restorative formula firms and tightens loose and sagging skin.

what K5 could do for you

- Relieve nerve pain¹
- Help skin anti-aging²
- Reduce bruising
- Help heal wounds
- Improve circulation
- Boost skin's immune system
- Moisturize & firm skin
- Improve capillary health
- Improve collagen production
- Lighten age spots
- Diminish spider veins

1 Diabetic Formula, 2 Restorative Formula

K5 restorative lotion formula

- repair thinning and fragile skin
- repair and restore dry brittle cracked skin

The Restorative Formula is specifically formulated lotion for fragile thinning skin, easily bruised skin, age spots, wrinkled, dry or brittle cracked skin. For those caring about

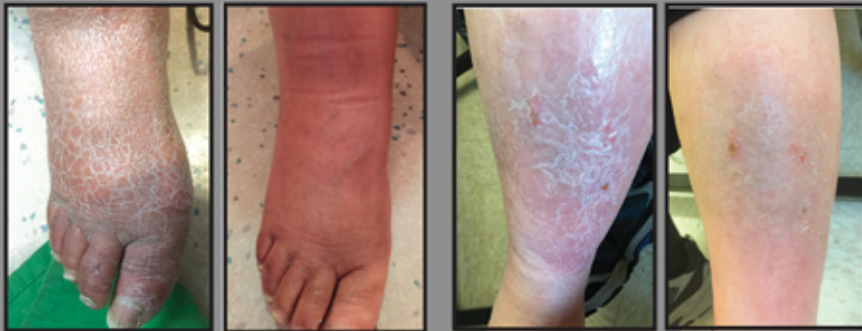

restoring and maintaining their skin's health and luminosity, the Restorative Formula has been formulated with Maca Root which helps infuse protein deep into the skin layers, thereby helping fight free radicals, increase collagen and even repair skin damage and reduce inflammation. You can even apply it everywhere from your face to your feet.
